

Dale Ramirez

Senior FullStack Web Engineer | pdaleramirez.com
(dalefirstpage@gmail.com | +63917 676 5236)

I am a Full Stack Web Engineer, specializing in the Laravel framework and Vue.js. I have 12 years of commercial experience in web development and six years of experience in developing Laravel applications.

As a Senior Back-end Engineer, it is important for me to write well-structured code with design patterns in mind. I follow the principles of test-driven development (TDD) and write extensive unit tests during development. Trust me, this approach will prove beneficial in the long term, especially as your application becomes more complex.

For debugging purposes, I utilize XDebug, which is readily set up in my PhpStorm.

I am actively involved in the open-source community and have submitted several PHP packages to packagist.org (<https://packagist.org/packages/pdaleramirez/>)

Furthermore, I am a plugin developer in Craft CMS: <https://plugins.craftcms.com/developer/pdaleramirez>

For a comprehensive overview of my work experience, please visit:
